

# Golf and Country Club Upgrades Member Storage With 99 Custom Lockers

The club upgraded its men's locker room with 99 custom Red Oak veneer lockers designed to improve member storage, organization, appearance, and security.

## INDUSTRY

### Athletics

Completed for a golf and country club environment where member experience and facility presentation are central to daily operations.

## LOCATION

### Missouri

Completed for a member-focused club facility in the Midwest.

## FACILITY TYPE

### Golf and Country Club

The project focused on the men's locker room at an exclusive 6,300-yard golf and country club.

## SOLUTION

### Custom Locker Room Upgrade

Southwest Solutions Group recommended and supported a locker room upgrade centered on custom-built premium lockers.

## PRODUCTS USED

### Member Locker Storage System

The system combined premium wood lockers, organized interiors, custom finish details, and Bluetooth-equipped smart locks for secure member storage.

## OPERATIONAL GOAL

### Modernize Member Storage

The club wanted a more functional, organized, secure, and refined locker room experience for members.

## THE PROBLEM

# Outdated Lockers No Longer Fit the Member Experience

The club wanted its men's locker room to better reflect the luxury experience members expected from the facility. The existing lockers were worn, lacked adequate storage structure, and used conventional locks that raised concerns for members leaving valuables behind while using club amenities.

BEFORE

01

### Worn Locker Room Appearance

The existing men's locker room no longer matched the refined environment the club wanted to provide. Worn lockers reduced the visual quality of a highly visible, member-facing space.

02

### Limited Member Storage

The locker setup did not provide enough organized space for clothing, personal items, and belongings. Members needed a clearer internal layout for separating items and keeping the locker area orderly.

03

### Conventional Lock Security Concerns

The club identified conventional locks as a concern for members storing valuables during club activities. A more modern locking approach was needed to support greater confidence while members used the amenities.

## Custom Golf Club Lockers Improve Storage and Security

Southwest Solutions Group worked with club management to plan a better locker room storage system. SSG provided 99 custom Red Oak veneer lockers with double-tier storage, shelving, coat hooks, Bluetooth-equipped smart locks, custom plating, and molding. The new golf club lockers improved member storage, organization, appearance, and security.

SOLUTION

### WHAT WE INSTALLED

#### 99 Custom Red Oak Veneer Lockers

The men's locker room received 99 custom Red Oak veneer lockers. Each locker included double-tier storage, integrated shelving, coat hooks, and Bluetooth-equipped smart locking technology.

### WHY IT FIT

#### Premium Wood Lockers With Organized Storage

The Red Oak veneer, custom plating, and molding supported the club's desired locker room appearance. Interior shelving, hooks, and double-tier storage gave members defined areas for folded items, hanging garments, and personal belongings.

### OPERATIONAL IMPACT

#### Better Member Storage and Security

The upgraded lockers gave members more usable storage structure while reducing clutter inside each locker. Bluetooth-equipped smart locks also helped address concerns about securing valuables during use of the club's amenities.

## Golf Club Lockers Planned Around Member Use

Southwest Solutions Group worked with club management to understand the condition of the men's locker room and the experience they wanted for members. After reviewing the need for better storage, organization, appearance, and security, SSG planned a system with 99 Red Oak veneer lockers and smart locking technology.

01

### DISCOVERY & SITE SURVEY

#### Locker Room Needs Review

SSG reviewed the club's locker room goals, including member storage, organization, appearance, and security. This assessment helped define the need for a custom locker solution suited to the men's locker room.

02

### LAYOUT, POWER & DATA PLAN

#### Smart Locker Configuration Planning

Planning focused on the locker configuration, member-use needs, and integration of Bluetooth-equipped smart locks within the custom locker design. The layout approach supported the club's goal for a finished, functional storage area.

03

### SUBMITTALS & APPROVALS

#### Custom Design Coordination

SSG coordinated the recommended locker design with club management before implementation. The planning covered Red Oak veneer lockers, custom plating, molding, shelving, hooks, and locking features.

04

### FABRICATION & DELIVERY

#### Prepare the Custom Locker System

SSG coordinated the custom locker and smart locking system for the men's locker room. The completed system included 99 Red Oak veneer lockers designed around member storage, organization, and security.

05

### INSTALLATION & TRAINING

#### Install the New Golf Club Lockers

SSG helped install the new locker system and supported the club's move from worn lockers to a more organized and secure member storage area.

06

### MAINTENANCE & SUPPORT

#### Support for Ongoing Locker Room Use

The completed locker room upgrade gave the club a storage system designed for daily member use. Organized interiors, premium finish details, and smart locks provided a clear foundation for maintaining function and appearance.

RESULTS

# 99 New Golf Club Lockers Improve Member Storage

The upgraded men's locker room gave members a more organized, secure, and refined storage space. The project replaced worn lockers with 99 custom Red Oak veneer lockers designed for personal storage and daily use.

PRIMARY OUTCOME

99 Custom Wood Lockers Installed

The project delivered 99 new Red Oak veneer lockers for the men's locker room. This gave the club a refreshed storage area aligned with its goal of improving the member experience.

WORKFLOW

Easier Storage During Club Activities

Members gained a more practical place to store belongings while using the club's amenities. Shelving, hooks, and double-tier storage supported easier placement of clothing, personal items, and valuables.

ORGANIZATION

Defined Storage Inside Each Locker

Double-tier storage, integrated shelving, and coat hooks gave each locker a clearer internal structure. This helped members keep belongings separated and better arranged.

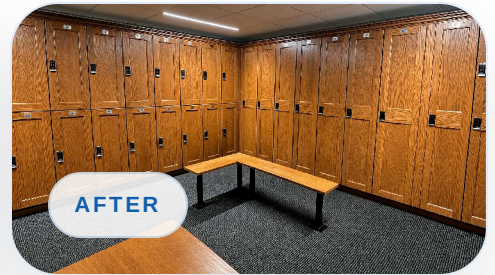

LONG-TERM VALUE

Premium Lockers Built for Daily Member Use

The Red Oak veneer, custom plating, molding, and smart locks created a member-facing locker room with improved appearance and function. The upgrade supported the club's ongoing need for organized, secure locker room storage.
